Dale; Hupe Mfg.

Thanks for the great job on anodizing/ "Diamondizing". The parts that you have done for us over the last several months have been finished and colored very consistently, and I cannot believe how hard and durable that finish is. Even with less than careful handling on the part of our people as well as our customers, no one has been able to deface the final product. That can't be said about past parts that were just anodized by both yourself and other vendors that we have used. Scratching, although it wasn't easy did occur, and that is now a thing of the past. That stuff is so hard that one of our "wearing" products is no longer a "wearing" product. I don't know how you do it but keep it going.

Thanks M.R.
